

DISCUSSION FORUM: USER ACTIVITY MISSING FROM THE NEEDS GRADING AREA

THE ISSUE

Instructors have reported student discussion submissions not displaying in the **Needs Grading** area despite students having posted in a graded Discussion Forum. Blackboard engineers are currently working to resolve the issue.

THE IMPACT

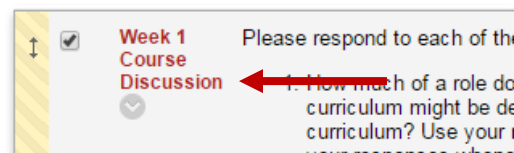

This issue does not produce any error and no student work is lost. However, instructors must adjust their grading workflow to ensure all student posts are graded.

THE WORKAROUND

1. Navigate to the **Discussions** area in your Blackboard course by clicking on the **Discussions** link.

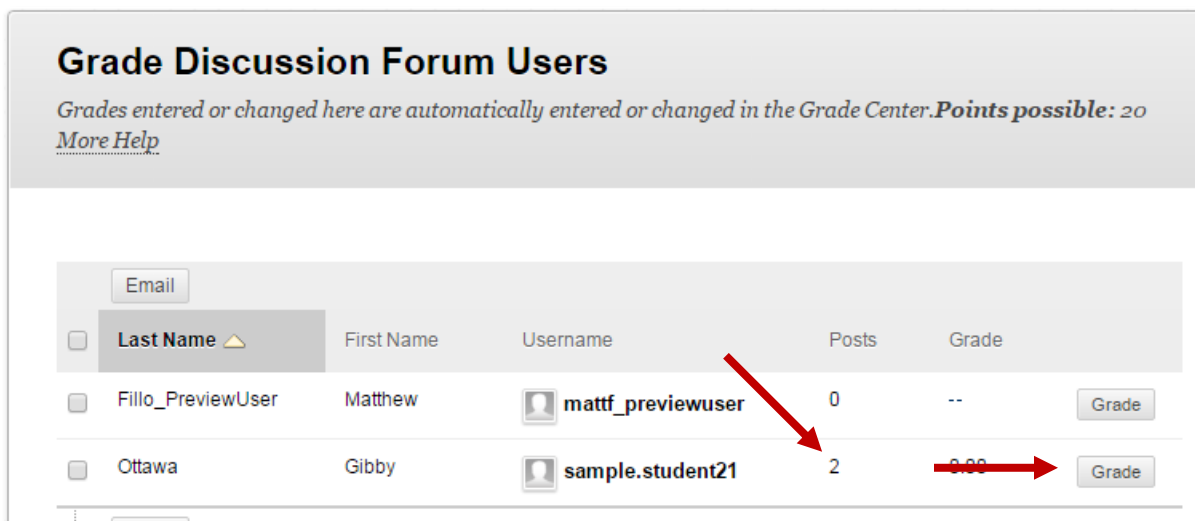

2. After the Discussion Board loads, click on the **forum title**.

- At the top of the next page, click on the **Grade Discussion Forum** button.

- The **Grade Discussion Forum Users** page appears. The number of posts each student has made is listed in the **Posts** column. Click on **Grade** button for the student requiring grading.

- The next page will display that student's Discussion Board contributions and allow for grades to be entered.
